# SHELTER MODEL

All shelters have inbuilt window sets, cable inlets, air con / heating duct ports, ceiling and wall hooks. Insulation liners are optional and recommend with usage of ECU sets (heating and cooling).

Shelters come complete with push poles, wind lines, stakes, floorsheet, groundsheet, carrier bag, repair kit.

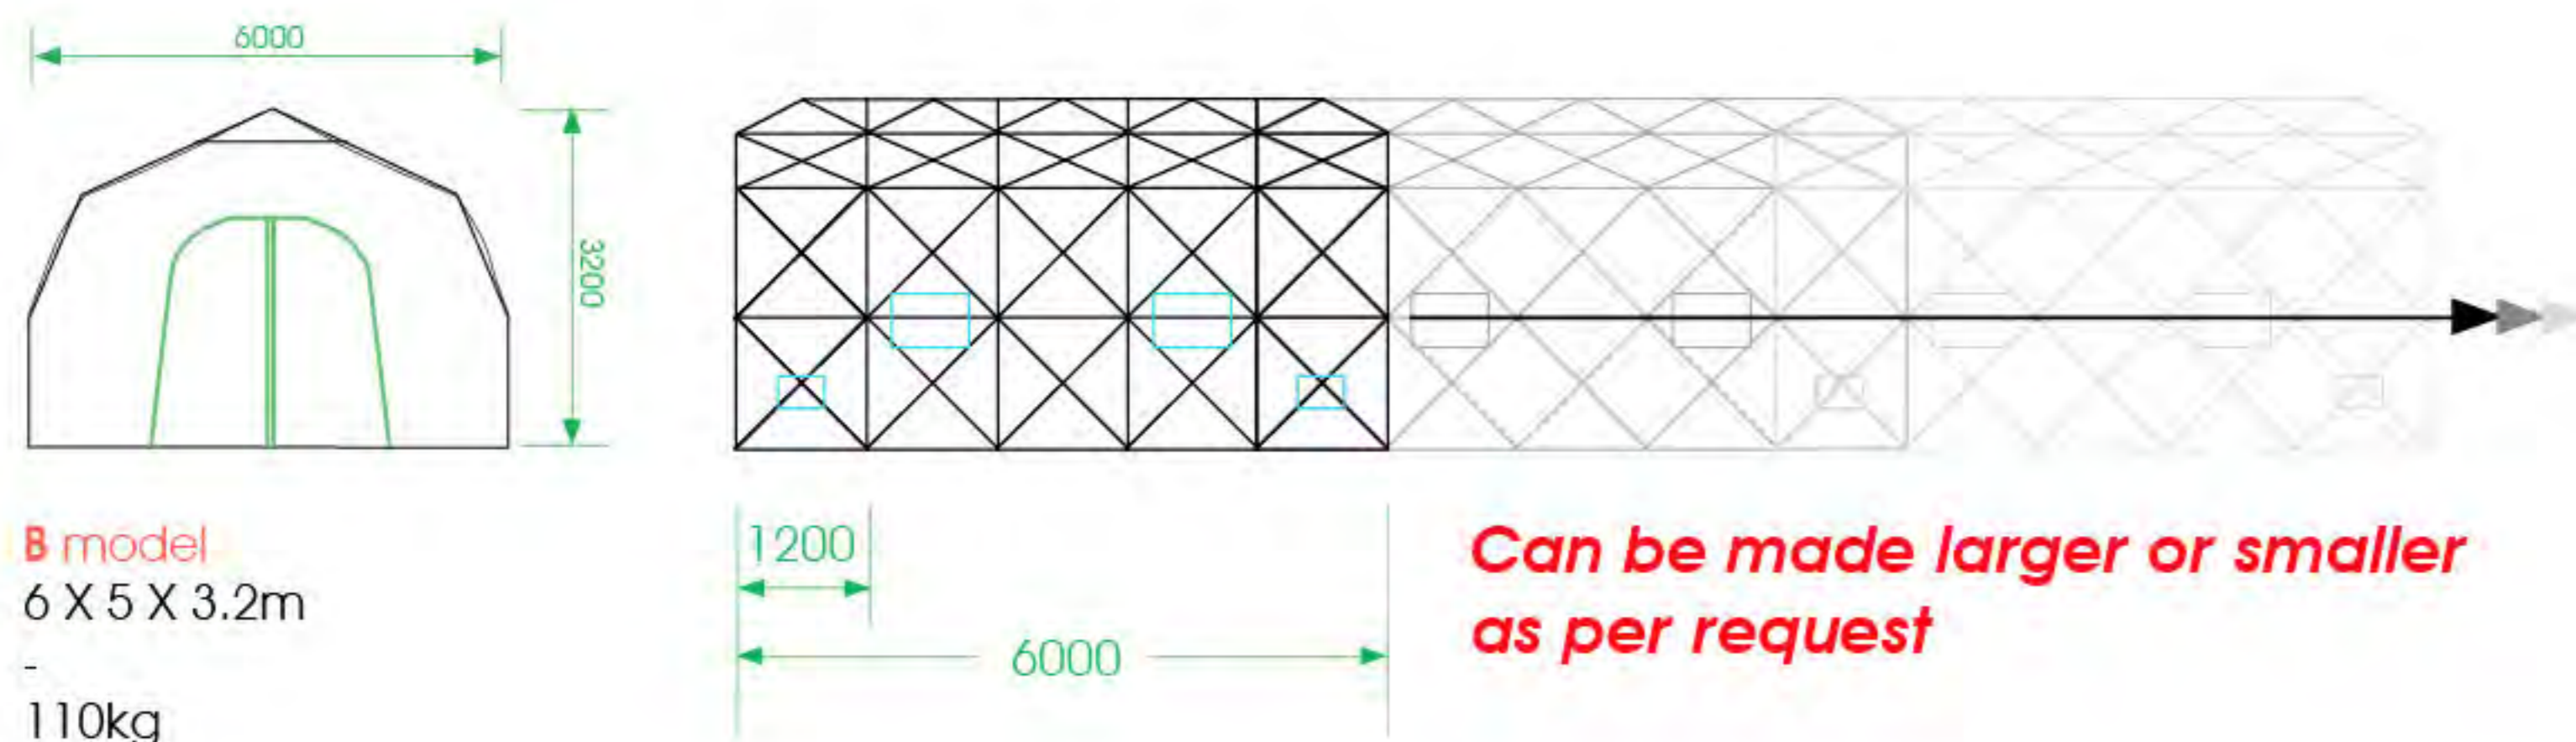

Note: The Insulation liner is an additional canvas layer to create an air pocket between the exterior and interior of the shelter. This serves to bring down temperature in the shelter. This is essential with the usage of Mobile Environment Control Units.
